There's no other way to do it! Load Covering Solutions (LCS) makes it happen!

Monster truck legend Dennis Anderson has created the baddest new mega mud truck, King Sling! With a competition wingspan of 101 inches, transporting this enormous show truck would normally call for mounting smaller "toter tires". But with the LCS sliding tarp system, it's possible to transport cargo that is maximum size! The LCS sliding tarp system is a removable load covering system. Able to expand to a true 102 inches in width, you can showcase your load right on the truck bed - just slide the tarp open and there it is; immediately on display! Most trucking companies don't realize this kind of load covering system even exists. Check out the pics - Dennis Anderson and his build team knew the LCS sliding tarp system was the only solution to showcase King Sling! Imagine how LCS could solve your wide-body shipment challenges every day. Attractive for marketing, easy to use, and the perfect solution for transportation requirements of any kind.

"The Load Covering Solutions team delivered the perfect solution for King Sling - and they can do the same for you!" - Dennis Anderson

Give us a call! We have the knowledge to help you!

## LCS Load Covering Solutions

LCS is honored to call Monster Truck legend Dennis Anderson one of their satisfied customers! Best known as the creator of Grave Digger, Dennis has now turned to the world of extreme mud truck racing with his newest creation - King Sling! Dennis and his crew used to transport King Sling in a traditional, enclosed hard-side trailer; but the truck's sheer size created the labor-intensive task of swapping in narrower tires to make it fit inside the trailer. The only loading solution that could take on King Sling was "the LOOK" sliding system by LCS. Offering additional interior width allowance on an open flatbed, King Sling can easily be loaded and covered within minutes.

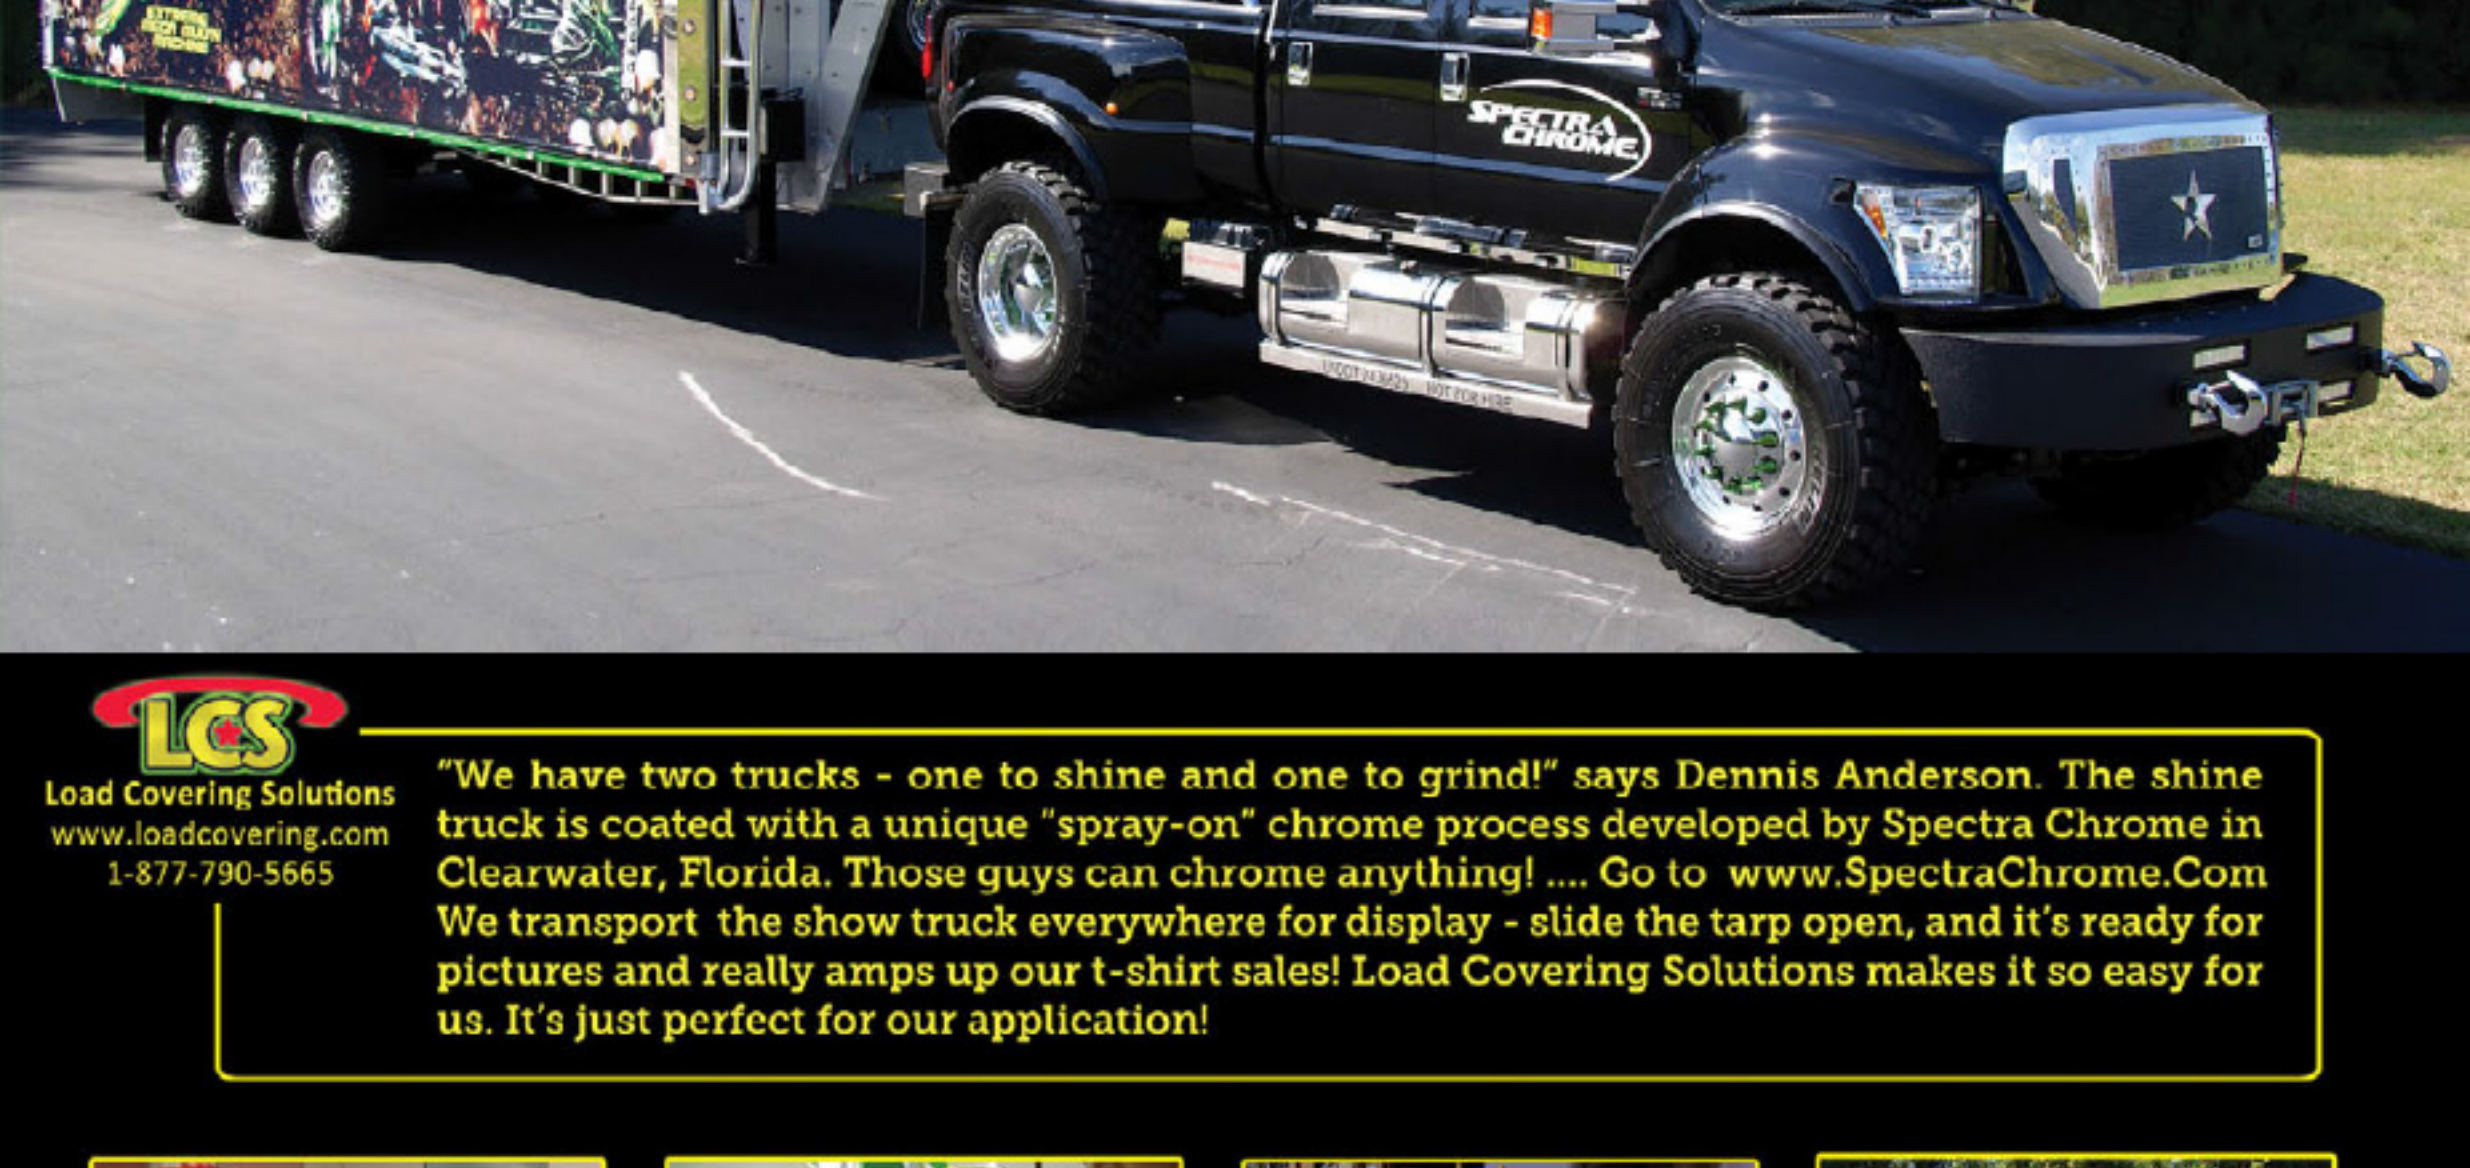

When your precious cargo needs to be covered and a traditional hard-side trailer just doesn't cut it, look to the creative solutions offered by TEAM LCS.

Give us a call today!

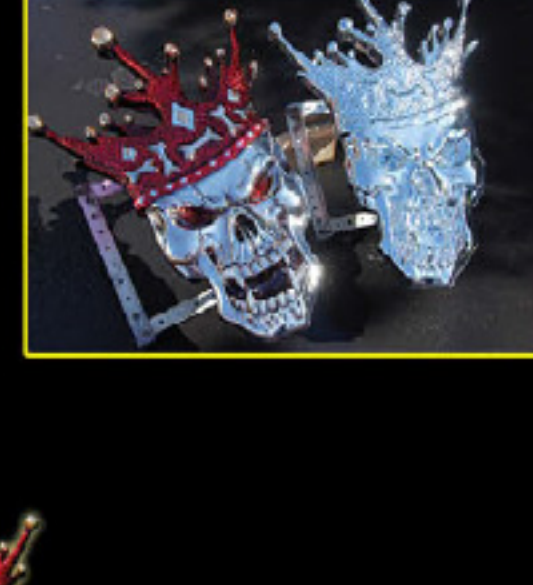

## Load Covering Solutions

.....is a specialized manufacturer that prides itself in responding to customer's unique load covering challenges. Accented with dynamic 4 color print graphics, companies can take full advantage of the advertising opportunities to promote their corporate messaging over the road! The LCS design department can assist you in bringing your corporate message to life. Let us work with your team and together we can ensure we impact your targeted market.

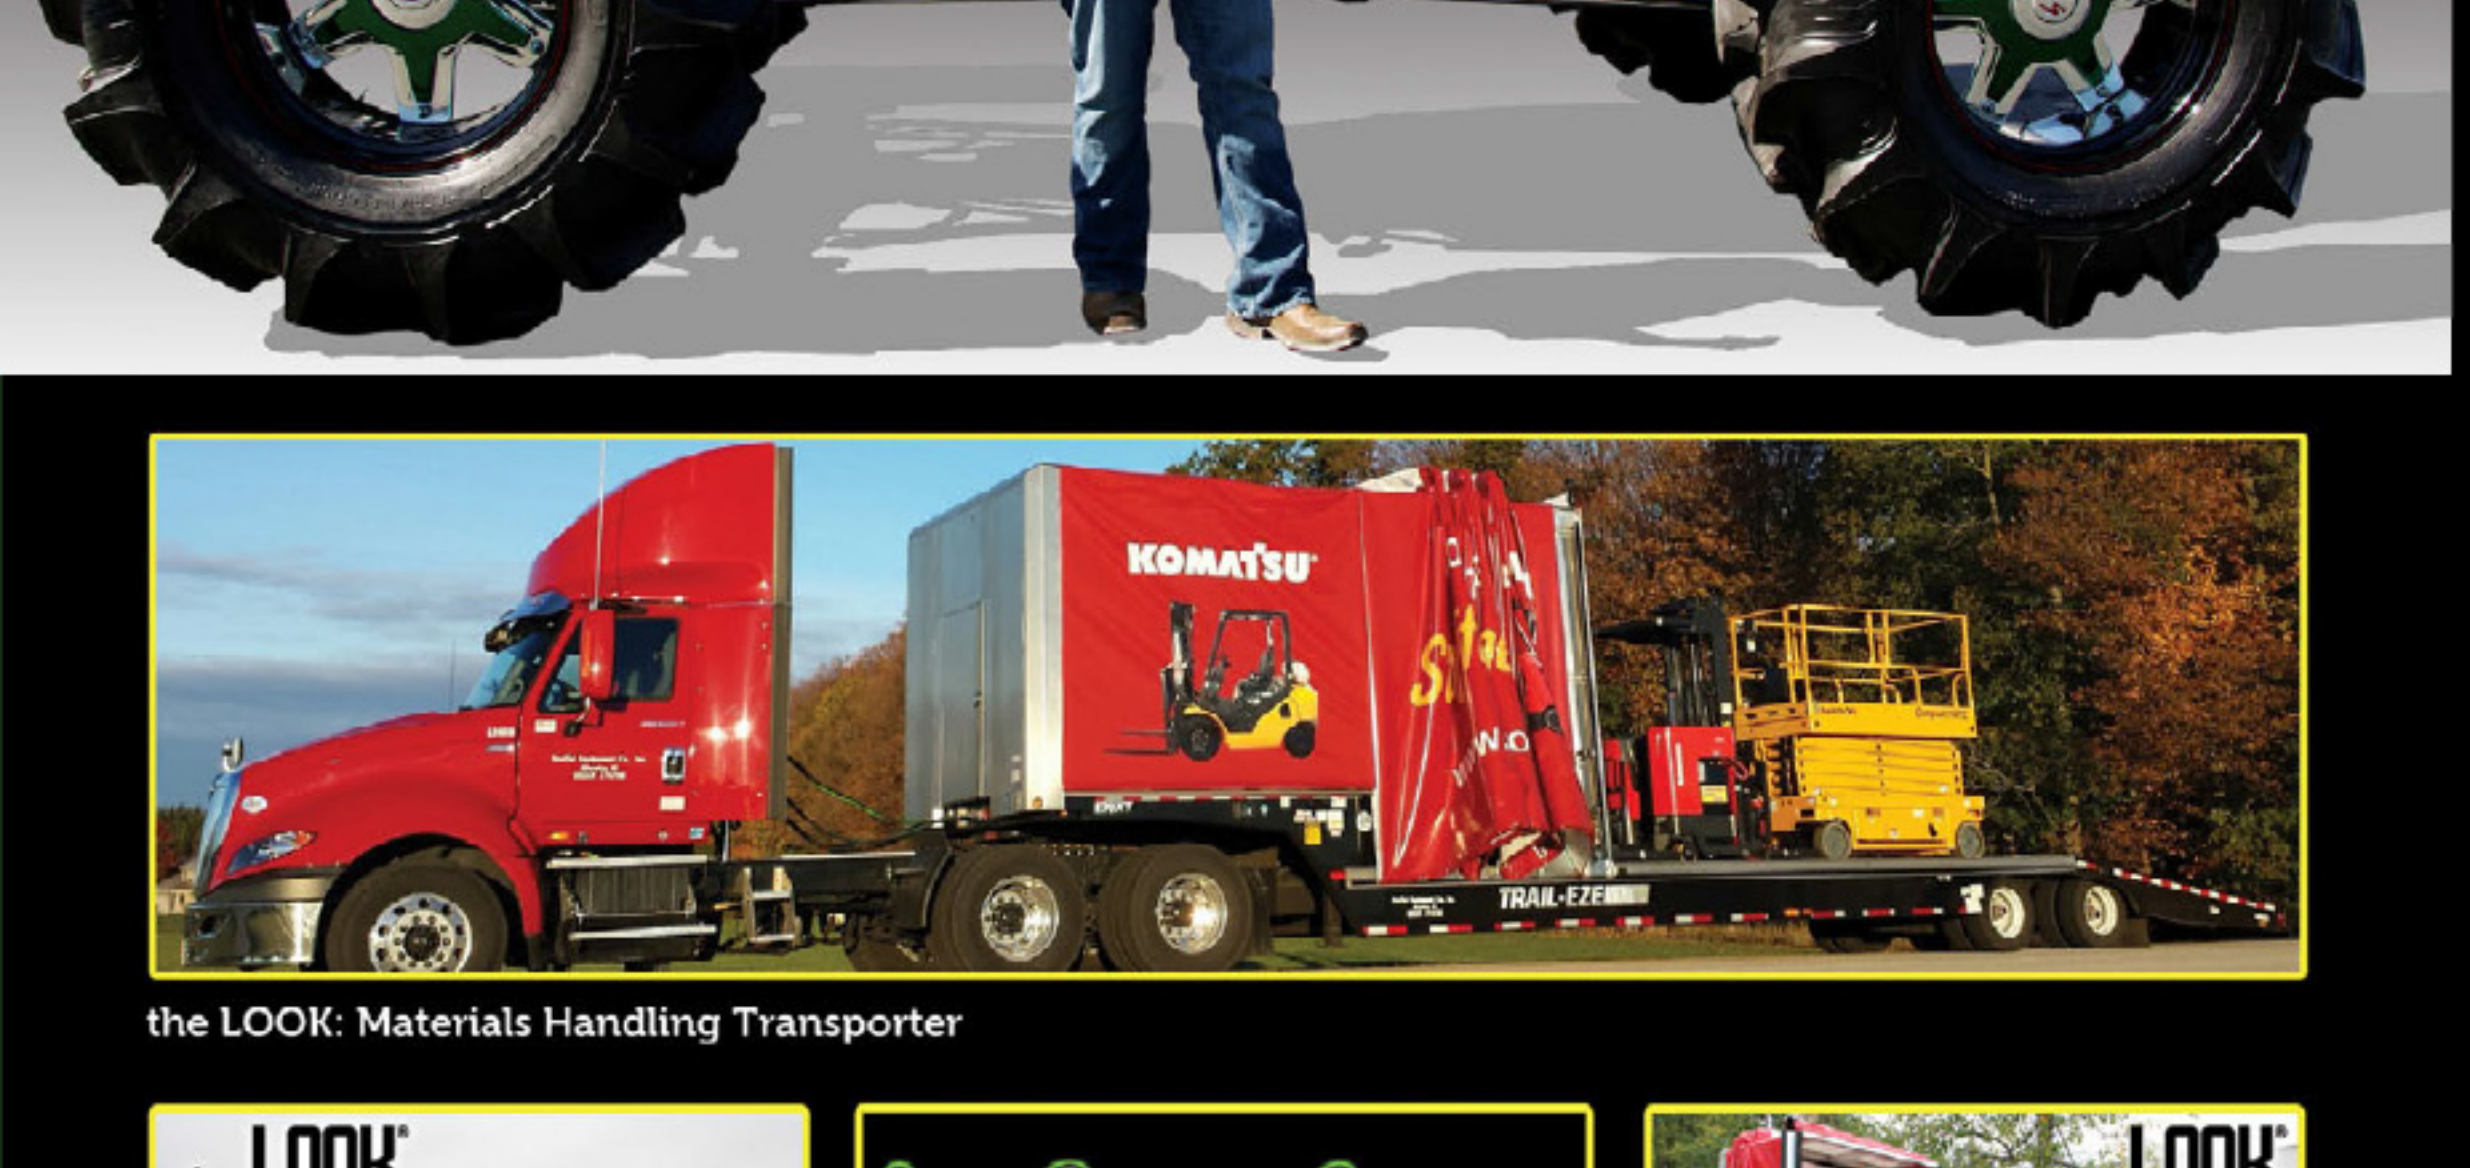

"We have two trucks - one to shine and one to grind!" says Dennis Anderson. The shine truck is coated with a unique "spray-on" chrome process developed by Spectra Chrome in Clearwater, Florida. Those guys can chrome anything! .... Go to www.SpectraChrome.Com We transport the show truck everywhere for display - slide the tarp open, and it's ready for pictures and really amps up our t-shirt sales! Load Covering Solutions makes it so easy for us. It's just perfect for our application!
