i-slide₄

LCS rolls back the clock and introduces a modified version of its original ROLL TOP of the 1990's. Built heavy duty to survive the unknown forces of mother nature the new i-Slide4 incorporates 25 years of over the road experience, engineering and design know how. Made lighter but just as robust, we redesigned the 6" aluminum track to be the industry's heaviest duty extrusion with a High Impact Lower Bump Guard to protect against forklift damage. Our 4" Steel Wheel with sealed bearings rolls on a formed V-Groove stainless insert, like the rail road, to ensure our system performs in any kind of weather. 2" SQ. Formed Aluminum Extruded Frames and a 20oz. PVC Customized One Piece Constructed Tarp, provides the North American Trucker with **THE BEST ROLL TOP VALUE MONEY CAN BUY, GUARANTEED!**
